

# Oi Bell Classic - Small - Koper

## Beschrijving

---

Bike bells generally look & sound a bit ugly. But why? What if they looked sexy & sounded like an angel playing a glockenspiel? A bell with a beautiful tone, but also a remarkable style and choice of materials that embodies a rider's personality. The Large size fits 23.8 to 31.8mm bars, while the Small fits 22.2mm bars.

### No Ordinary Bike Bell

Reinventing a 2,000 year old bell design was never going to quick. 140 prototypes, 1000's of springs and over 5 years in conception brought us here.

- Subtle design that wraps around your handlebar
- Considered cable management system
- Beautiful tone that's loud but pleasant (80+ dB)
- Stronger & louder than predecessor
